Since Denman Moody doesn't really need an introduction in the wine world, I'll introduce him as the expert trip planner that he is!

We have been friends of the Moodys for many years and of course have enjoyed many fine wine moments with both of them. However, the most memorable and fun wine experience is the one my husband and I enjoyed after Denman had carefully planned it for us. He also planned one for my daughter and myself on a girl trip to Napa.

We were in Napa and Sonoma for several days and had the most incredible experience! We visited a huge array of wineries...from large and famous to small boutique wineries. Our visits were well planned and the attention paid to us upon arrival at each winery was delightful! Each winery has a story...whether large or boutique and we had amazing hosts at each place to tell us the stories of how they began and continue on producing such amazing wines. My favorite story was at Tudal Winery. Denman actually planned this trip for my daughter and myself. We were greeted by Matt Tudal, the grandson of the originator of the vineyard. His grandfather had passed away that year but while he was in the hospital for an extended period, Matt fell in love with his grandfather's nurse. They were getting married at the vineyard that fall. Oh how I would have loved to have been invited!

To have Denman plan a trip for you to any wine area...not just Napa or Sonoma..is a real treat. Everything is taken care of to perfection. Places to dine, places to stay...everything.

I would always highly recommend Denman to plan a wine adventure for anyone.
